GRADUATE ACOUSTIC CONSULTANT

BRISTOL

We value passion and encourage original thinking.

A career at MACH offers you the opportunity to work for an acoustics and building physics consultancy that puts sustainability first.

At MACH we enjoy being challenged, solving complex acoustic and building physics design problems through exceptional engineering and by thinking differently. We are idealists and inventors and are constantly improving what we do by encouraging creativity to develop and improve our processes, products, software and so on. We are therefore seeking similarly minded individuals to join our team.

We have a good reputation and well-defined learning and development plans which get the most out of people. Where maths, computation, and coding forms part of our core and provides our clients with the ability to solve the hardest of challenges, as you can see from the Founding Director, Ze Nunes' TEDx talk (<https://www.youtube.com/watch?v=KxsXzirPBgo>).

JOB ROLE DESCRIPTION

GRADUATE ACOUSTIC CONSULTANT

We are looking for graduate acoustic consultants for our Bristol office. The role will bring you into our team where you will be aided and trained, to develop your own skills as a consultant. Graduate training will be provided to allow you to work in all sectors of MACH, from testing to environmental, from residential projects to low carbon sustainable schools and so on. As part of this you will be required to learn and develop your skills focused in and around designing buildings and building elements to a high standard and to current standards and guidance.

Modelling and software is a core part of what we do, you will therefore be supported and assisted to develop your skills in CATT, Odeon, INSUL, Cadna/A, Revit and other software modelling tools. If you have an interest in coding and script writing this will be very much encouraged.

MACH GROUP

We Are Hiring Graduates

WHY WORK FOR MACH GROUP?

WHAT WE OFFER?

Diversity

MACH is a diverse company, with an ethic in encouraging diversity and equal opportunities.

Opportunity

Competitive salaries and flexibility are at the heart of our employment policies, creating a team of people who look after each other and maximise the company's skills and differences.

Excellence

Our work arises from our excellent team, which includes architects, , product designers, daylighting and thermal engineers and a wide range of outstanding acoustic engineers. MACH offers staff the opportunity to grow and take responsibility at an individual desired level.

Baffled façade reducing thermal gains whilst improving sound reduction

Thinking Differently
